

Southeast University Examination Paper (C)

Course Name Principles of Compiling Examination Term 19-20-2 Score _____
Related Major Mid-Term Self Test Examination Form Close test Test Duration 120 Mins

There are 5 problems in this paper. You can write the answers in English or Chinese on the attached paper sheets.

1. Please construct a context-free grammar **with ϵ -free productions** for the following language (20%).

$L = \{f^m a^n \omega b^n g^m \mid m \geq 0, n \geq 0, \omega \in (c, d, e, f)^* \text{ and the numbers of } c\text{'s and } d\text{'s and } e\text{'s occurred in } \omega \text{ are even} \}$

2. Please construct a **DFA with minimum states** for the following regular expression. (20%)

$((aa^*|bb^*)^*(a|b))^*(a|b^*)$

3. Please **eliminate the left recursions (if there are)** and **extract maximum common left factors (if there are)** from the following context free grammar, and then decide **the resulted grammar** is whether a LL(1) grammar by **constructing the related LL(1) parsing table.**(20%)

$S \rightarrow Sa | Ab$

$A \rightarrow Ac | Bd$

$B \rightarrow Se|f|Cg$

$C \rightarrow Bh|j$

4. Please **construct a LR(1) parsing table for the following ambiguous grammar with the additional conditions(You determine the required additional conditions by yourself).(20%)**

$E \rightarrow E \text{ and } E|E \text{ or } E|\text{not } E|(E)|b$

5. Please prove that if a context-free grammar G is a LL(1) grammar, then it must be a LR(1) grammar.(20%)
